CAPTURE 200 Wins the 2009 WFX New Product Award for Best Projection Screen

CARTHAGE, MO, Nov. 18, 2009 – AccelerOptics is pleased to announce they are the recipient of the 2009 WFX New Product Award for Best Projection Screen! This award recognizes the most innovative new building and technology products for the church and house of worship markets. WFX is the leading event for church facilities and technology teams and is presented by both Church Production Magazine and Worship Facilities Magazine.

The CAPTURE 200" 16:9 format front projection display measures 8 feet high by 14 ½ feet wide, and without compromising contrast, returns spectacular still and video images in high ambient lighting environments to create a superior viewing experience for the audience. The clarity and brightness of these images rival those of plasma, cube walls, tiled LCDs, and LED displays. Because of its patented Optical Brilliance Technology in the display's surface, CAPTURE allows lower-lumen projectors to be used to achieve these vibrant images.

Churches routinely struggle with ambient light challenges not only in the worship center, but also in entrance foyers, fellowship halls, youth centers and rehearsal suites. The need for large, effective displays in these areas is growing and CAPTURE provides a solution that is both brilliant and affordable.

About CAPTURE Displays

Developed by AccelerOptics LLC, CAPTURE is an innovative optical projection surface that efficiently captures and uniformly distributes projected light to deliver brilliant images in high ambient lighting conditions with unprecedented gains of up to 5. Not only do CAPTURE Displays cure the traditional screen concerns of ambient lighting, they also overcome the physical weight, power requirements and pricing issues of large electronic displays. Available in a variety of sizes and formats ranging from 72" to 200", CAPTURE Displays have been installed in airports, shopping malls and religious institutions, among others. For more information about CAPTURE Displays, visit www.capturedisplays.com or contact Jenny Brust, Business Development Manager, at 417.237.0905.
