CARTHAGE, MO, Dec. 15, 2008 – AccelerOptics' CAPTURE™ Digital Front Projection Display was recently selected as one of *Religious Product News'* 2008 Hot Products & Services!

As the No. 1 product and service magazine in the church market, their sole mission is to help church leaders make purchasing decisions. While they receive numerous new product releases every single day throughout the year, their list is made up of the “best of the best!”

Today's churches are experiencing tremendous growth, and they need great products to help operate their facilities more effectively and efficiently.

About CAPTURE Displays

Developed by AccelerOptics LLC, CAPTURE is an innovative optical projection surface that efficiently captures and uniformly distributes projected light to deliver brilliant images in high ambient lighting conditions with unprecedented gains of up to 5. Not only do CAPTURE Displays cure the traditional screen concerns of ambient lighting, they also overcome the physical weight, power requirements and pricing issues of large electronic displays. Available in a variety of sizes and formats ranging from 72” to 200”, CAPTURE Displays have been installed in airports, shopping malls and religious institutions, among others. For more information about CAPTURE Displays, visit www.capturedisplays.com or contact Jenny Brust, Business Development Manager, at 417.237.0905.
